E-NEWSLETTER OF THE OTICON FOUNDATION IN NEW ZEALAND

Dear,

Welcome to the Oticon Foundation's e-newsletter.

The establishment of the Oticon Foundation in New Zealand was inspired by the Oticon Foundation in Denmark which was set up in 1957. The Danish Foundation's statutes mandate that income is used to support the needs of hearing-impaired individuals as well as funding organisations. It sponsors social and educational programmes, publications, conferences, cultural activities and campaigns for researchers, hearing-care professionals and the general public.

The Danish Foundation has supported many causes that have originated in New Zealand, the most recent being the human rights educational 'toolkit' developed by Louise Carroll in her role as voluntary human rights officer for the International Federation of Hard of Hearing (IFHOH).

In this issue you can read about the toolkit and IFHOH's activities, as well as other causes that the Foundation supported in 2014. I hope you enjoy our newsletter.

*Karen Pullar*  
*Secretary to the Trustees*

## Human rights educational toolkit goes global

The Convention on the Rights of People with Disabilities (CRPD) IFHOH Toolkit is designed to empower people with hearing loss to stand up for their human rights, as set out in the United Nations CRPD. Thanks to a major grant from the Oticon Foundation in Denmark, it is about to go global.

## Professor Chuck Berlin brings audiologv

## research and jazz to Wellington

Internationally acclaimed audiologist Chuck Berlin made a flying visit downunder to speak at the July NZAS conference. Renowned for his ability to make complicated concepts accessible to parents, teachers, hearing care professionals, and academics alike, Professor Berlin is universally recognised in the audiology world as 'the teacher's teacher'.
